Component	Priority	Requirement Name	Requirement Description
Documentation	1	Sufficient installation instruction	All the necessary steps for installing an instance of Augur should be within documentation
Documentation	1	Notable Error Handling	Common errors, especially ones found by our group, should have specific documentation to solve these problems
Documentation	1	Use instructions	Documentation should include instruction on how to use the system in order to access metrics generated by the system
Documentation	2	Explanation of system functions	Documentation should give a clear understanding to a adequately knowledgeable user about how the system functions
Documentation	2	Information clarity	Information provided by the documentation should be clear and easily understandable by individuals looking to use the system
External Documentation	3	Sufficient External Documentation	External documentation for specific errors that prevent smooth installation of Augur that can be referenced.
Testing	3	Documentation Testing	Users utilize documentation in order to fix issues. The outcome of the user helps determine the effectiveness of the current documentation

Testing		4	Evaluation of Documentation changes	Based on user response, we can edit our documentation to be more clear in certain areas to make for easier use
Documentation		4	Expanding platform support	Expanding documentation to support other operating systems
